#### VPL Skin Rejuvenation

VPL is a fantastic way to get lasting changes in your complexion that you may not be able to achieve with traditional skin care regimes. The intense pulse of light is applied to the skin penetrating to the deeper layers to stimulate the skin's building blocks such as collagen and elastin and help bring melanin (brown pigment from sun damage) to the surface where it can be exfoliated away. If you are serious about improving the look and feel of your skin then VPL is going to achieve results!

NOTE: Because everybody's skin is different and this is an intense skin care treatment, a pre-treatment consultation is required.
