

Environ

Environ skincare founded by world renowned plastic surgeon, Dr Des Fernandes, pioneered the use of varying effective doses of Vitamin A and combined it with vital antioxidant Vitamin C. The result is a powerful skincare range targeted at repairing and restoring vitality to all types of damaged skin.

Environ skin care products have been formulated to combat and relieve the harmful effects of the harsh climatic changes of today's environment specifically pollution and ever-increasing doses of radiation from the sun due to the thinning of the protective ozone layer. Added to these are the modern-day effects of social and work stresses and poor diet.

Vitamin A is vital for healthy skin. It promotes the production of healthy collagen and elastin and improves the natural moisturizing factor of the skin. The strength of vitamin A increases through the range of Environ Original products. This enables the skin to acclimatise to the formula and to gain maximum long-term benefits.

The Environ products offer a definite regime to nourish, protect and maintain a healthy, youthful and beautiful skin. Each product is made from the highest quality ingredients. They are mostly free from fragrance, preservatives, colourants and animal extracts.
